

Product Description

This application comes as an Add-In, a Custom button added to the SharePoint Ribbon.

Before using the Bulk Metadata app it is advised to add custom column(s) in SharePoint Document Library

After adding the columns select one or more documents and click the button a dialog will appear.

Enter the properties of the column 1 and press update button; it will update all the selected document properties of column 1

Enter the properties of the column2 and press update button; it will update the selected document properties of column 2
